Research Ethics Governance Framework

Why is ethics review important in research?

➤ **Human Subjects Research can only be implemented after an ethics review has been conducted**

- Refers to research involving obtaining, investigating, analyzing or using human specimens or an individual person's **biological behavior, physiological, psychological, genetic or medical information**.
- **Penal Provisions** : The responsible ministry of central government may fine the research entity a penalty (NTNU), the principal investigator / affiliated personnel in the amount of no less than NT\$100,000 nor more than NT\$1,000,000.

For a period of one year thenceforth, the violator may not apply to any government agency nor any government funded foundation for research grant assistance.

Why is ethics review important in research?

- **According to “Human Subjects Research Act” (Article 5)**
- **Applications for grants for research projects commissioned by NSTC and other institutions**
- **For journal publication**
